

## CONTRIBUTE TO A HEALTHIER ENVIRONMENT

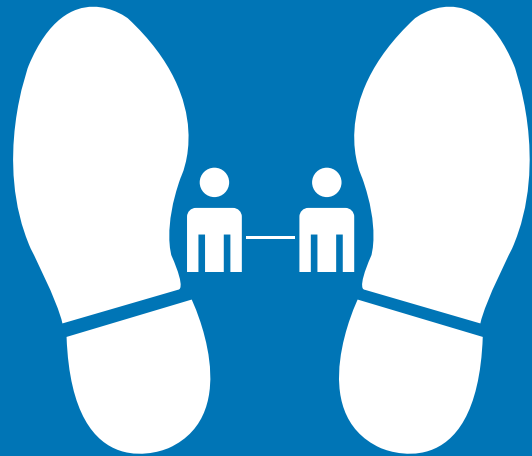

Ensuring safety and health with KONE's wellbeing solutions

KONE Social Distancing Solutions

## ELEVATOR PHYSICAL DISTANCING FLOOR STICKERS

### Reminds passengers about social distancing

- Sticker is placed on elevator car floor
- Size: 600 mm x 400 mm
- Gives passengers clear guidance on where to stand in the elevator, in terms of social distancing and capacity of the elevator

## CAPACITY ADJUSTMENT IN ELEVATOR TO MAINTAIN SOCIAL DISTANCING INSIDE CAR

### WHY DO WE NEED TO LIMIT NUMBER OF PERSONS IN ELEVATOR CAR?

- To support physical distancing inside the elevator car
- Not to allow too many passengers in the elevator
- Enhancing Safe elevator ride by avoiding close contact with others

### HOW TO LIMIT NUMBER OF PERSONS IN ELEVATOR CAR?

- By setting new carload % with "Full load & Over Load"
- New load limit setting varies from 5% - 110% of rated load according to the customer specification
- On reaching overload inside the car, car Doors remain in open with Audio (Car buzzer) and Visual (Overload indication in COP) indicating overload inside the car, after excess persons leaving the car, car door gets closed
- When car load reaches as per the new full load % set value, Elevator car bypasses the landing calls - not taking more passengers from other floors
- Also supporting with car capacity control floor stickers to visually indicate the number of person allowed with new carload %
- New car load % level can be reset later to the current value
